COLOUR RUN

A flash of turquoise on your lower lids looks sexy and cool (plus the blue counteracts redness and brightens eyes). Reach for a waterproof formula to keep the line smudge-free.

HOT HEADED

Add volume, fight frizz and stay sleek in the heat – here's how.

If you blow-dry...

Working in an anti-static product – be it a spray, mousse or oil – allows for better absorption and a longer-lasting style in the scorching heat. Finish your session

with one minute on the cool setting. "It closes the cuticle, imparts shine, controls frizz and keeps the hair in shape," says Anthony Nader, owner of Sydney's RAW salon.

If you air-dry...

Sea-salt spritzes and dry texture sprays do more than dishevel, they help absorb excess moisture throughout the day. Apply to damp roots and allow to dry naturally.

Ponytail rules...

"The higher the tail, the more casual and playful the effect – a low ponytail instantly gives off a chic and elegant vibe," says Nader. □
