GWEN STEFANI

Total curl

These fun, flirty and seriously full-on disco diva curls are not for the faint-hearted! Wella Professionals Care & Styling ambassador Travis Balcke tells us how to create this retro look.

- 1 "To protect your hair and add hold, start by applying a blowdry lotion and a heat protection product to damp hair," says Travis. Next, "Make a low side-part and loosely blow dry with a diffuser."
- 2 "Brush your hair out and apply a volumising mousse to the mid-lengths and ends," advises Travis. "If you need extra texture, also apply a salt spray."
- 3 "Using a small 2cm long, curl 2cm sections of hair from the mid-lengths to ends only," says Travis.
- 4 "Once curled, brush the mid-lengths of the hair out with a paddle brush," explains Travis. "The product already in the hair will cause it to bounce up and create that textured look. The top part from the root should stay sleek and flat."
- 5 The next step? "Smooth the hair at the top of your head down, making sure it's sitting flat," says Travis. "Secure with some bobby pins, making an indent all the way round, in line with the tops of your ears."
- 6 You're almost there! Explains Travis, "Using your fingers, pull the curled hair wide and high over the pins to cover them and add more volume. Finish with a generous mist of hairspray to hold."
